THE VISION

House of Commons (HOC) is first and foremost an exceptional team of entrepreneurial leaders who have achieved rare success in the fields of cannabis, entertainment, branding, retail, marketing, and ecommerce. These leaders have come together to create a successful brand family of CBD products targeting a range of consumer markets to compliment the needs of specific lifestyles.

Our goal is to own a stable of premier CBD brands that dominate their product categories. HOC has assembled all the core operational pieces, developed proprietary formulations, found high-quality suppliers, sourced unique packaging, planned for fulfillment, secured mass distribution channels, established a wholesale network, planned marketing & promotion, planned direct selling capabilities, and created initial demand for our wholly owned product brand families. Our core business differentiators are: 1. collective executive expertise, 2. vertically aligned and integrated operations, 3. massive distribution partner opportunities, and 4. the creation of highly-effective, next-generation CBD consumer products.

We will thrive in an industry we have come to understand exceptionally well from decades of successful business operations. We are prepared to execute against a well-built operational plan that will enable us to quickly grow our U.S. and international markets by promoting intelligently crafted brands through the efficient use of our valuable supply chain and distribution channel partners like KushCo and EcoGen Labs – two highly valuable business relationships that will prove to be game changing for our brands and this industry.
